Date of Birth: 10/4/1994

"I am a passionate professional who recognizes the tremendous value that data brings to our society. With extensive industry experience in various positions and roles, I possess a deep understanding of its dynamics. Continuously exploring new technologies, tools, and data processes, I am committed to fostering the growth and expansion of organizations. My unwavering dedication to my profession is complemented by my love for cycling. Physical exercise is vital to me as it serves as a stress reliever and creates mental space for generating innovative ideas and concepts."

• MS Azure Cloud • ETL • Data Modeling • PySpark • Python • DevOps • SQL • Tableau • Power BI • Git
• Marketing Analytics • Web Analytics • Marketing Strategy • E-Commerce

WORK EXPERIENCE

1/2024 – Now **Analytics Engineer** |ABN AMRO Amsterdam, Netherlands

Key Responsibilities

• **Designing and implementing data pipelines:** Creating efficient and scalable data pipelines that extract data from various sources, transform it into a usable format, and load it into storage and databases.
• **Developing and maintaining data models:** Designing and implementing data models that organize and structure data for analysis. This includes defining data schemas, optimizing data storage, and ensuring data integrity. I'm working closely with stakeholders to understand business requirements and translate them into effective data models.
• **Collaborating with data scientists and analysts:** Collaborating with data scientists and analysts to understand their data needs, provide them with access to relevant data sources, and ensure the data is accurate and trustworthy for analysis. Additionally, assisting in building machine learning models, developing dashboards, and generating insights from data to support decision-making within the organization.

3/2022 – 12/2023 **Advanced Analytics Consultant** |ERNST & Young Amsterdam, Netherlands

Key Responsibilities

• **Visual Data Solutions:** I excelled in crafting and maintaining powerful data visualization tools. Utilizing cutting-edge technologies, I simplified complex data sets for clients, fostering easy access to actionable insights.
• **Data Infrastructure Guidance:** I provided expert guidance in building robust data infrastructures for organizations, facilitating effective data storage, processing, and analysis. This empowered clients to harness data for informed decision-making.
• **Predictive Analytics and Automation:** I spearheaded the development of advanced predictive analytics models and automation solutions, leveraging data engineering expertise. These innovations enabled clients to streamline marketing operations and enhance efficiency.

3/2022 – 12/2023 **Interim Data Analytics Engineer** |Nike Hilversum, Netherlands

Key Responsibilities

• **Data Pipeline Development:** Designed and built data pipelines to collect, process, and transform raw marketing data from various sources, ensuring data accuracy and accessibility for analysis.
• **Real-Time Data Streaming:** Implemented real-time data streaming solutions to enable the continuous flow of marketing data, supporting instant insights and agile campaign adjustments.
• **Automated Reporting:** Created automated reporting systems that generate and distribute reports on key performance metrics, reducing manual effort and enhancing data-driven decision-making.

6/2021 – 2/2022 **E-Commerce Analyst** | Karl Lagerfeld Amsterdam, Netherlands

Key Responsibilities

• **Data Pipelines:** I efficiently managed data pipelines to support visual reporting. By creating interactive and automated dashboards, I facilitated easy access to real-time data insights for stakeholders.
• **Sales Forecast:** Leveraging time series forecasting models, I accurately predicted sales for karl.com and various marketplaces. This enabled informed decision-making and effective resource allocation.
• **Budget Allocation:** Through Regression Models, I determined optimal budget allocation across different platforms and stages of the sales funnel. This approach helped the marketing team to maximize their return on investment and optimize marketing strategies.
• **Market Basket Analysis:** Utilizing advanced analytics techniques, I performed market basket analysis to identify key recommendations for related products and online behaviors. This helped karl.com to enhance its cross-selling and upselling strategies.

1/2019 – 6/2021 **Marketing Manager** |Torvol Amsterdam, Netherlands

Key Responsibilities

• **Data-driven Insights:** I converted raw data into actionable insights by leveraging predictive and modeling techniques. This allowed the organization to make informed decisions and drive future outcomes.
• **Sales Forecast and What-If Analysis:** Using Regression Models, I accurately forecasted sales and conducted What-If analyses to simulate various scenarios. This enabled the team to make strategic decisions and adapt to changing market conditions.
• **Touchpoints Customization:** I customized touchpoints in marketing strategies based on Regression Models, tailoring them to specific customer segments. This approach enhanced customer engagement and improved marketing effectiveness.
• **Marketing Funnel Optimization and Visual Reporting:** I optimized marketing funnels to maximize conversions and ROI. Additionally, I developed visual reporting solutions that provided clear insights into marketing performance, facilitating data-driven decision-making.
• **Marketing Operations Management:** I played a pivotal role in developing and managing the company's marketing operations in the USA and Asia. This involved coordinating marketing activities, optimizing processes, and ensuring successful implementation of marketing initiatives in both regions.

EDUCATION

09/2020 – 7/2021 **VRIJE UNIVERSITY OF AMSTERDAM** Amsterdam, Netherlands
